Welcome to the home of the 3D savage, Michael Popovich.

Recently completed some freelance work on a pilot show for British production called Captain Scarlet. I would love to show you some of my work on this production, but I can't since I'm under an Non-Disclosure Agreement (NDA). If you're into CGI and love Science Fiction television, the show looks very promising. Look for it in the near future. Here is the link to the Captain Scarlett production:
